

# Andriy Nikolov

## [Knowledge Media Institute](#)

The Open University  
Walton Hall  
Milton Keynes  
MK7 6AA  
United Kingdom

phone: +44(0)7933225788

e-mail: [a.nikolov@open.ac.uk](mailto:a.nikolov@open.ac.uk)

homepage: <http://kmi.open.ac.uk/people/andriy/>

Citizenship: Ukraine

## Research interests

My main research interests are in the semantic data management domain, in particular:

- *Semantic data integration*. This is a complex problem which arises when combining semantic data from different repositories and involves several more specific problems such as instance coreference resolution, inconsistency resolution, and ontology matching.
- *Linked Data*. Linked Data rules for publishing semantic data online already allowed making many important data repositories available on the Web. Growing amount of publicly available semantic information opens many opportunities for reuse and integration of data as well as introduces several important research challenges, such as discovering relevant data repositories and identifying overlaps in data sources.
- *Knowledge representation*. My work in the SmartProducts project includes building ontologies modelling information needed to interact with the user in an intelligent way: in particular, context data (including sensor data), user profile, product capabilities, etc.
- *Data mining*. Data mining algorithms provide a powerful tool for solving various problems arising in semantic data integration. Semantic data repositories published within the Linked Data initiative provide large volumes of semantic data, which can serve for training machine learning algorithms.

## Professional Experience

### Research Associate

May 2009 – Present

*Knowledge Media Institute, The Open University, Milton Keynes, UK*

- Researcher in the [SmartProducts](#) EU project (2009-present). The project addresses research issues related to the development of consumer product enhanced with intelligent capabilities. In this project I am the **work package leader of WP2 “Semantic modeling and management of proactive knowledge”** which deals with **development of ontological knowledge models** supporting context-, user-, and task-awareness of smart products.
- As part of this work, I participated in **development of the [W3C Semantic Sensor Network ontology](#)**.
- Participant in the [LUCERO](#) JISC project, which deals with publishing various university-related data repositories using Linked Data principles. My role in this project involves interlinking published repositories with external publicly available sources, in particular, **discovery of relevant data sources on the Web and generation of links between resources**.

### Research Assistant

October 2005 – April 2009

*Knowledge Media Institute, The Open University, Milton Keynes, UK*

- Researcher in the [X-Media](#) EU project (2006-2010). The project focused on combining information extraction and Semantic Web technologies to facilitate corporate knowledge management.

- While working on my PhD dissertation titled “*Fusing automatically extracted annotations for the Semantic Web*”, my main contributions were **design and implementation of knowledge fusion algorithms for integration of semantic data from different sources**.
- As part of this work, I **designed and implemented the [KnoFuss](#) semantic data fusion system** which tackles the problems of coreferencing and inconsistency resolution occurring when merging semantic repositories structured using OWL ontologies.
- Participated in the **development of the [PowerAqua](#) semantic question answering system** which allows querying semantic data distributed in different repositories using natural language queries. My contribution primarily involves developing algorithms for merging and ranking of retrieved search results.

#### Software developer

October 2004 – September 2005

*Self-employed, Sverdlovsk, Ukraine*

- Developed the EMailAnalyzer experimental tool for mining workflow patterns from e-mail logs. The tool was implemented as a plugin for the [ProM](#) process mining system.
- Participated in the development of the Nemo Database (database covering statistical data on fishing vessels, plants, and sea farming).

#### Software developer (intern)

September 2002 – August 2004

*SalesManager Software BV, Amsterdam, Netherlands*

- Developed modules for the SalesManager CRM system.

### Education

#### PhD in Computer Science

October 2005 – September 2009

*Knowledge Media Institute, The Open University, Milton Keynes, UK*

- Thesis title: “Fusing automatically extracted annotations for the Semantic Web”.

#### MSc in Artificial Intelligence

September 2002 – September 2004

*Vrije Universiteit, Amsterdam*

#### Engineer in Computer Science

July 2002 – June 2003

*Kharkov National University of Radioelectronics (diploma with distinction)*

#### Bachelor in Computer Science

September 1998 – June 2002

*Kharkov National University of Radioelectronics (diploma with distinction)*

### Academic involvement

- Reviewer: [International Journal of Semantic Web and Information Systems](#), [Journal of Computer and System Sciences](#), [IEEE Transactions on Systems, Man, and Cybernetics](#), [Journal of Web Semantics](#).
- PC member: [ESWC 2012](#), [OM 2011](#), [SSN11](#), [ESWC 2011](#), [SSN10](#), [EKAW 2010](#).
- Co-organizer: [EKAW 2012](#), [OAEI 2011](#), [OAEI 2010](#), [OAEI 2009](#).
- Member: [W3C Semantic Sensor Networks XG](#)

### Technical skills

#### Primary:

- Programming languages: Java
- Semantic Web standards: RDF, RDFS, OWL, SPARQL
- Ontology engineering tools: Protégé, NeON toolkit
- Web development technologies: JSP, Java Servlets, JBoss, Apache Tomcat
- Database management systems: MySQL
- Semantic Web tools and APIs: Sesame, Jena, OWL-API, OWLIM, Pellet, BaseVISor
- Data mining tools: Weka

#### Secondary:

- Programming languages: C++, Python, Delphi
- Database management systems: PostgreSQL, MS SQL Server
- Web service standards: WSDL, SOAP
- Rule engines: Jess

### Language skills

#### Fluent:

- English
- Russian (native)
- Ukrainian

#### Limited knowledge:

- Chinese (1 year part-time course)
- German (1 year part-time course)
- Dutch (lived in Amsterdam for 2 years)

### Recommendations
